DETAILED ACTION

1. Claims 1-21 are currently pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, item v, the phrase "ingesting the beverage" does not seem to fit logically into the context of the item.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-30 of U.S. Patent No. 6,660,308 in view of US Pat. No. 4,647,453.

Art Unit: 1654

US '308 claims a composition for treating inflamed tissue. This composition has all of the same ingredients as applicant's claims except US '308 does not contain calcium. US '453 teaches using calcium in compositions to treat inflamed tissue such as arthritic tissues (see columns 1 and 2). Thus, it was known in the art that calcium is a useful ingredient to use to treat inflamed tissue. Based on this knowledge, a person of ordinary skill in the art would reasonably expect beneficial results could be achieved by adding calcium to the composition taught by US '308. Due to this reasonable expectation of success, the artisan would be motivated to modify the composition of US '308 to include calcium

4. No claims are allowed.
